

# QA Introduces 55 Crown Tip Style For Long Stroke Probes

To capture smaller leads and posts in dual level testing, QA's self-cleaning 55 steel crown tip style is now available in our 0.400 [10.16] long stroke 075-40 and X50-40 probe series.

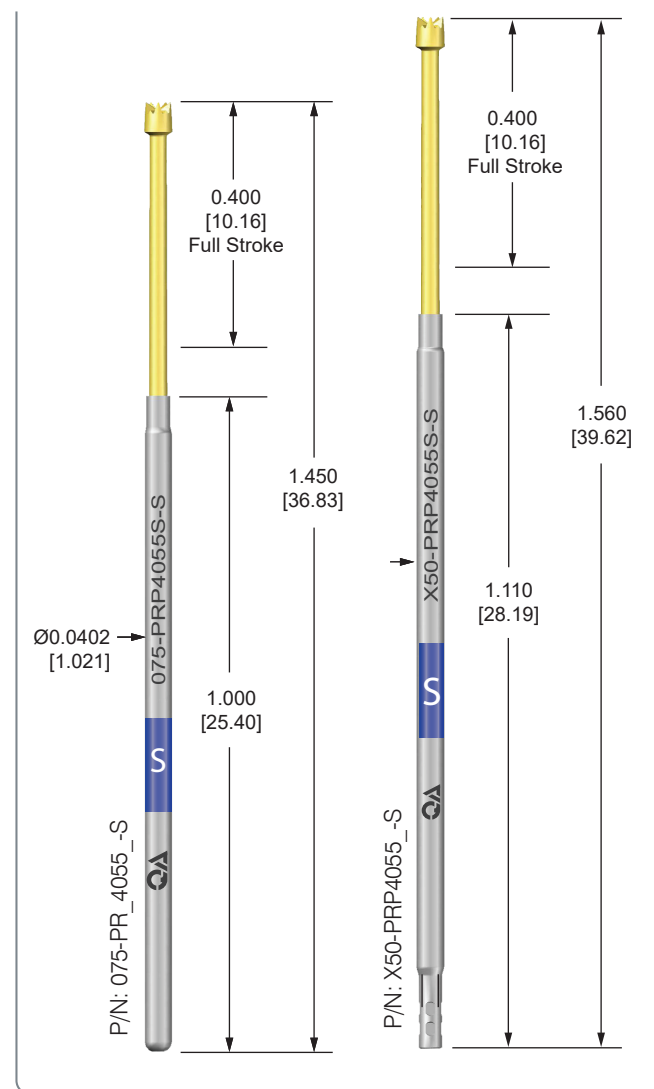

This crown has five high and five low ridges to trap and prevent the lead or post from glancing off the head. The short inner ridges make them stronger and less susceptible to damage while their self-cleaning design reduces contaminant buildup, making them easier to clean.

QA's high quality probe tips and fast delivery continue to provide a variety of solutions for your high-volume test needs.

55 Crown

## 075-40 and X50-40 SERIES
